Dr. Arshad Ahmad
Vice Chancellor, LUMS
Vice Chancellor’s Message

Rooted in its cherished values, LUMS is uniting its five Schools through integrated curricula and engaging in a number of university-wide initiatives to strengthen its research capacity, teaching excellence and internationalisation efforts.

This year, we will be launching The Learning Institute, Continuing Education Studies, Office of Programme Enhancement, Centre for Advisement as well as an Office of Inclusivity and Accessibility. These will be complemented by renewed mandates for centres that focus on water, energy, policy and business in society that are contributing to solving national and broader regional challenges.

Transdisciplinary education at LUMS is a fully shared mission ensuring that our work serves society at large and those less fortunate than us. Our purpose lives on through the communities we serve.

I invite you to read further, participate with us and explore LUMS and its new directions.

Thank you!

Dr. Arshad Ahmad

900+ Recruiting Partners

1 in 3 students receive Financial Support annually and PKR 5.85 Billion has been disbursed since inception

4,500+ Students

100% Scholarship for PhD Students

13,000+ Alumni
The University
LUMS, a not-for-profit organisation established in 1985, is a unique destination for lifelong learning. Just as the world has changed over the past three decades, so has LUMS, leading with a progressive and innovative curriculum and discovery research. Its five Schools have nurtured leaders in areas ranging from entrepreneurship, economics, biology, mathematics, engineering, education, writing, politics and business—in all spheres of life.

The LUMS community is driven by a shared purpose: to make a better world through providing an inclusive space to students from all segments of society and conducting socially relevant research.

The University’s intellectual capital are LUMS faculty who are recognised experts in academia who continuously strive to transfer innovation and increase social engagement.

They bring their global learning to their classrooms and foster mentoring relationships with students. It is this sense of collaboration which creates an environment that rewards teamwork, promotes progress and challenges traditional disciplinary boundaries. LUMS students find in their professors a community of scholars that is both appreciative of diversity and bold in its outlook. A major hallmark of the teaching pedagogy at LUMS is that it encourages the students to apply their knowledge and come up with progressive 21st century solutions.

With ingenuity and drive, our graduates have contributed in areas as far as optics, organic molecules, entrepreneurship and medical research to name a few.
Cutting-edge research at LUMS is positioned to re-examine the mission of higher education from the perspective of technology transfer and innovation, continuing education, and social engagement.

Adding to this, the LUMS community continuously comes together to responsibly serve and improve the well-being of society. As part of its National Outreach Programme, the University reaches out to over a hundred cities across Pakistan, attracting talent from underprivileged segments of society. As these students graduate, they go back to their communities, positively impacting them and changing their socioeconomic dynamics.

Today, the University is setting high standards of academics and producing responsible professionals who can compete globally.

Not-for-profit Status

LUMS is a federally chartered university and is approved as a not-for-profit organisation under section 2(36) of Income Tax Ordinance, 2001 in terms of provisions of Clause 63 of Part IV of Second Schedule to the Ordinance. Any individual or organisation making donations to LUMS is entitled to a tax credit under section 61 of Income Tax Ordinance, 2001. Moreover, the University has been granted exemption from the levy of income tax under Section 159 of the Ordinance, thus, tax is not deductible on payments made to the University.
Getting to Know Lahore
Pakistan’s second largest city, Lahore, is known for its cultural as well as contemporary life. Great food, never-ending entertainment, quality educational institutions, diverse shopping areas, acres of greenery and ongoing cultural activities that include arts and crafts exhibitions, film and literature festivals and concerts make it one of the most vibrant cities of the country. Lahore is the place to be if you wish to experience modernism at its best; the vibrant malls with brands from across the world, a convenient metro bus system right in the middle of the city and international food franchises. It offers a variety of food choices that range from traditional to continental to fast food.

Lahore is also a centre of higher education in the country. It has some of the oldest educational institutions and LUMS has quickly positioned itself as top of its class.

The city is also known for its historical monuments and its countless poets, scholars, writers, intellectuals and scientists. Standing tall in one corner of the city are the grand Lahore Fort, the magnificent Badshahi Mosque and the Sheesh Mahal, a UNESCO recognised world heritage site. The Minar-e-Pakistan (Pakistan Day Memorial) is another historical landmark built to commemorate the day when the Pakistan Resolution was passed on March 23, 1940.
Our Schools
Providing quality education through its rigorous programmes, LUMS is a significant educational landmark of the city. Its impact in the fields of business management, humanities, science and technology, education and law cannot be underscored enough.

Today, LUMS graduates and academia interact with the community, making Lahore a centre of intellectual engagement. There is a fundamental commitment to critical thinking and academic freedom which is followed at the University.

Students are encouraged to develop the ability to question, analyse, explore and execute effective and progressive strategies. A spirit of curiosity, of risk-taking, and of thinking outside the box is actively inculcated in them.

The students at LUMS are at the centre of the learning experience and have the liberty to curate and customise their educational trajectory. They can pick up courses from different Schools and Departments, and this transdisciplinary approach is key to innovation and discovery at LUMS.

Education here is learner-centred with a strong focus on relevance, originality of thought and quality. It is holistic and provides a vision beyond national boundaries. Students are encouraged and expected to go beyond classroom learning and solve issues of the world. They are taught the skills to explore, research, and not limit themselves.

The five Schools at LUMS offer a variety of degrees at the undergraduate, graduate and doctoral levels.
Suleman Dawood
School of Business (SDSB)
Established in 1986, SDSB is the oldest school at LUMS. It recently earned the Association of Advance Collegiate Schools of Business (AACSB) international accreditation, making it the first business school in Pakistan to attain this prestigious recognition. In addition to the flagship MBA programme, it offers an Executive MBA, a course-based PhD in Management with specialisations in Organisational Behaviour and Strategy, Finance, and Operations Management, and a Bachelor’s programme with majors in Accounting and Finance, and Management Science.

The School also carries out rigorous economic and management research through the Research Unit, Social Enterprise Development Centre, Case Research Unit, Centre for Business and Society, Centre for Islamic Finance and the China-Pakistan Management Initiative.

As a leading management School in the region, the Case Study methodology has been honed over the past 30 years and is central to SDSB’s approach to practical business education today. Meanwhile, its stronghold on experiential learning makes students develop an entrepreneurial mindset.
Mushtaq Ahmad Gurmani School of Humanities and Social Sciences (MGSHSS)
The School enjoys a strong reputation of academic excellence, with its programmes generally considered as the strongest in Pakistan. It focuses on a multidisciplinary approach, imparting a high quality liberal arts education.

MGSHSS plays a significant role in undergraduate programmes at LUMS, and offers majors in Anthropology and Sociology, Economics, Economics and Politics, Economics and Mathematics, Political Science, English and History.

It currently consists of two departments: Economics and Humanities and Social Sciences. MGSHSS has an innovative Core Curriculum, which features a strong liberal arts component. Thus, students emerge as reflective, empathetic, and historically informed individuals, with an understanding of both global and local issues.
Syed Babar Ali School of Science and Engineering (SBASSE)
The School is dedicated to exploring the creative power of science, technology, engineering, and math, and it makes a special effort to spark that same passion in its enrolled students.

Launched in 2008, SBASSE is the first private research school combining Science and Engineering in Pakistan, with a vision to carry out world-class, multidisciplinary education and research.

The School believes in collaboration and there are no boundaries between disciplines. Modelled on some of the leading universities of the world, it aims to lead a paradigm shift in Science and Engineering education in the country.

Housed in a purpose-built complex, with state-of-the-art teaching and research laboratories, SBASSE has a number of advanced facilities, allowing its faculty and students to conduct groundbreaking research leading to solutions for the common man.

SBASSE offers a four-year undergraduate programme of Bachelor of Science in Biology, Chemistry, Computer Science, Electrical Engineering, Mathematics, Physics and Chemical Engineering as well as a joint major in Economics and Mathematics. The School also has a robust MS and PhD programme in all these disciplines except for Chemical Engineering.
Shaikh Ahmad Hassan
School of Law (SAHSOL)
The Department of Law and Policy, which has been functioning since 2004 through MGSHSS and later evolved into SAHSOL, now offers a 5-year joint BA-LL.B (Honours) undergraduate programme. The BA-LL.B (Honours) degree allows students to spend the first two years towards fulfilling the essential academic prerequisites for a sound legal training as well as vital communication and computer skills. Over the next three years, the students undergo rigorous exposure to fundamental and specialised subjects in law, as well as exciting new interdisciplinary areas such as law and economics, regulation and policymaking.

The School’s mission is to produce impactful research that promotes human rights, socioeconomic development, and the rule of law, and to develop and disseminate innovative techniques for the teaching and training of Pakistani law. Initiatives developed in line with this mission are the Street Law programme, an innovative form of clinical education and community engagement, and the ‘Law for Business Executives’ programme.
The School of Education is the fifth school at LUMS, which is set to operate at the crucial nexus of research, policy and practice, supporting a faculty that is internationally competitive, connected and relevant.

The curriculum, featuring extensive field engagement, will produce graduates capable of becoming strategic leaders, policy researchers, and reflective practitioners, distinctly placed to direct and shape a reimagined and vibrant education reform agenda for Pakistan. The School offers a minor in Education and an MPhil in Education Leadership and Management led by world-class faculty hailing from top universities in the US and UK.

A Teaching and Learning Initiative (TLI) has also been conceptualised to spearhead the field engagement component under the MPhil Practicum Programme through which the School collaborates with a diverse group of local “lab schools.”
Transdisciplinary Education
Knowledge is unbounded and various potential discoveries lie outside compartmentalised structures. Realising this, the University encourages a transdisciplinary approach, providing students the opportunity to work with knowledge drawn from two or more academic disciplines offered at the five Schools. This creates a powerful learning experience, emphasising integrative learning, critical thinking, and creative problem-solving.

This is supported by dynamic faculty who make the multidisciplinary learning experience enriching and seamless.

LUMS students are thus able to discover the value of integrating the study of various academic disciplines suited to their lifelong interests; learn creative solutions to some of today’s most challenging problems; become interdisciplinary thinkers who analytically and creatively embrace new ideas; develop collaboration skills while working with others who have different perspectives and be prepared for higher studies and careers in new and emerging fields.
Life at LUMS
The atmosphere at LUMS fosters excitement, a spirit of curiosity and a strong sense of community. There is always something happening on campus; this might be a lively discussion with faculty or an event bringing together poets from all over the country.

Students are encouraged to discover different aspects of their personalities and hone a diverse set of skills. Student-led societies at LUMS cater to all types of people with a myriad of interests. Students get the opportunity to meet like-minded people as well as get exposed to various situations as society members that help them grow as individuals and professionals.

Being at LUMS gives one the chance to interact with people from various backgrounds and experiences. The diverse student body sometimes organises events together, travels abroad together and often has candid and lively conversations with each other while they brainstorm and exchange ideas. Whatever someone’s interest, whatever their personality type, life at LUMS is always an unforgettable experience.

The Campus
LUMS has a green, beautifully landscaped, vibrant residential campus, spread over 100 acres, with excellent facilities. The modern residential dormitories offer a friendly and secure environment to its inhabitants, and are furnished with a wide range of facilities including Wi-Fi, TV lounges, game rooms, laundry rooms, kitchens and easy access to dining facilities. Dedicated hostel staff is accessible to students for help at all times. A 24/7 Health and Wellness Centre on campus is well equipped for the provision of emergency medical services to all members of the LUMS community.

All facilities are a short walk from each other, ensuring that students have easy access to everything they need. The campus is adjacent to the Defence Housing Authority, a well-developed suburb of Lahore with shops, restaurants, hospitals and other facilities nearby.

Students also have access to a number of dining options offering a variety of cuisines that cater to all kinds of taste buds. From Pakistani food and barbeque, to Chinese cuisine and salads, everything is accessible without the students having to leave campus.

LUMS also houses the Syed Maratib Ali Sports Complex as well as the Coca-Cola Aquatic Centre with state-of-the-art sports facilities that help students not only keep an active lifestyle but also unwind and re-energise in a healthy way. In addition to sports facilities, LUMS also houses the Gad and Birgit Rausing Library, a multidisciplinary library serving the faculty, students, researchers and staff of the University. The library has a wide range of print collections and online services including subscription of print and online journals, access to e-libraries, social science publications among several others.

The University’s Profile
Faculty and Research Acumen
LUMS is known for leadership in innovative education, and its faculty is composed of men and women who are world-class scholars. They rigorously pursue research at the leading edge of their fields. They balance groundbreaking research with invitations to lecture around the world, hold patents and awards, are consulted by high-ranking government officials or noted corporates.

The range of research activities at LUMS is broad and deep. LUMS faculty conduct research in almost every field, and seek to expand human knowledge through analysis, innovation, and insight. Research efforts at the University are enhanced through creative collaborative efforts with leading research institutes and consortia around the world. Our faculty conducts multidisciplinary research that is published in top ranked referred academic journals.

The last 5 years have seen an 80% increase of these academic leaders being published in internationally renowned journals. Their books, edited volumes and case studies are used as teaching instruments across mainstream academics, and executive trainings at LUMS.

The research conducted at LUMS also facilitates connections with industry partners, providing solutions to business, community and government organisations. Our faculty addresses global problems through their in-depth research, tackling topics such as climate change, education, digital literacy, linguistics and genealogy. Their research has made a mark in conferences around the world and received numerous international awards and accolades.
Centres at LUMS
LUMS houses research centres which are actively exploring new horizons in their respective disciplines. It provides dedicated facilities for collaborative research where scientists, engineers and medics from a range of backgrounds address global challenges in areas such as water scarcity, healthcare, epigenetics and energy. Flagship centres catering to research needs in science and technology include the Centre for Water Informatics and Technology, the Centre for Advanced Studies in Mathematics, National Centre in Big Data and Cloud Computing and the LUMS Energy Institute.

LUMS also boasts a long, successful history of partnership and collaboration with the industry. It is consistent in creating spaces for corporations, SMEs, start-up businesses and entrepreneurs to work alongside the University at every stage of their development and growth. Some of the prominent centres are the National Incubation Centre, the strongest hub for incubation of start-ups in the country, the Rausing Executive Development Centre, which offers a wide range of executive development and training programmes, responding to the development needs of managers and leaders in the country, and the Centre for Business and Society which provides a collaborative space for faculty, staff, students and community members to engage in a stimulating narrative on the most pressing social issues facing Pakistan.

LUMS works with the community to make a positive impact in local education, enterprise, employment and social reform. All Schools maintain a programme of events and activities to involve the community, businesses and organisations in their work and share their research and innovations. Centres endorsing social and cultural change are the Gurmani Centre for Languages and Literature, which promotes languages and their literature through teaching, research, publications and their outreach programme; the Saida Waheed Gender Initiative that leverages research, teaching, and praxis related to gender, and the Social Enterprise Development Centre working towards the capacity building of social enterprises in the country.
Alumni
LUMS alumni, a powerful network spread across the world, are a valuable source of support for the University, continuously contributing their time, funding and resources through various avenues, including professional networking events and mentorship programmes. With 13,000+ alumni around the world who are contributing to the private and public sectors in diverse industries, there is an abundance of experience and wisdom to benefit from.

Making World-class Education Accessible
Since inception, LUMS has disbursed PKR 5.85 Billion in financial support, and annually, nearly 35% of the student body receives some form of financial assistance. Generous financial support is offered for all programmes based on an applicant’s academic performance and assessed financial need. The University adheres to merit as the sole criteria in its decision-making. Admissions are independent of a student’s ability to afford tuition fee and a talented student will always be welcome.

Financial Support includes Loans, Merit Scholarships, Need-based Tuition Fee Waivers, Application Processing Fee Waivers, Testing Fee Refunds and National Outreach Programme Scholarships.

The beneficiaries of financial support stand as role models for their peers belonging to the same social strata, who dream of receiving higher education from an excellent institution like LUMS and shaping successful career paths after graduation. The credit for their success obviously goes to the University’s continued aim to make quality education accessible.

The National Outreach Programme

The LUMS National Outreach Programme (NOP) is a prestigious scholarship focusing on identifying meritorious students with exceptional academic records and inducting them into the University’s undergraduate programmes.

Launched in 2001 to extend the benefits of world-class education to talented students who are constricted by financial circumstances and belong to far and remote locations across Pakistan, the NOP scholarship does not differentiate on colour, caste or creed. It targets underprivileged, bright students to transform them into future leaders who will return to their communities as positive change agents.

To date, LUMS has inducted more than 1,100 NOP students, of which around 595 have graduated.

In the last year, the National Outreach Programme reached 18,000 students by visiting 77 cities such as Dhirkot, Kohat, Karimabad, Mailsi and Tando Adam.
For the past three decades, generous donors have supported the University—paying the tuition fees of deserving students, contributing towards buildings and infrastructure, research as well as creating scholarships and funds. These donors believe in the LUMS cause of making quality higher education accessible to all and have confidence in the potential of its students as well as its prowess.

Here are the names of patrons who have extended their invaluable support to LUMS over the years.

Giving is the Essence of Life
LUMS, a not-for-profit organisation, is committed to its vision of education that is accessible to all. Every donation, big or small, counts towards the University’s scholarship initiatives.

All persons donating to LUMS are entitled to a tax credit under section 61 of Income Tax Ordinance, 2001 since the Federal Board of Revenue has granted exemption to LUMS from the levy of income tax under Section 159 of the Income Tax Ordinance, 2001. Therefore, tax is not deductible on payments made to LUMS.

The University welcomes all contributions. Whatever amount you choose to donate is an investment in the future of our country. However, if you wish to donate for something specifically, there are several options to consider. These include:

<table>
<thead>
<tr>
<th>Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergraduate Student</td>
<td>*PKR 0.9 million/year</td>
</tr>
<tr>
<td>Graduate Student</td>
<td>*PKR 0.5 million/year</td>
</tr>
<tr>
<td>MBA Student</td>
<td>*PKR 1 million/year</td>
</tr>
<tr>
<td>NOP student's education inclusive of all necessary study related costs that range from tuition fee to boarding expenses, book allowance, monthly stipend etc.</td>
<td>*PKR 1 million/year</td>
</tr>
</tbody>
</table>

To sponsor high impact research in any field of study, interested donors can fund a project or set up an endowed chair.

To help the University build and maintain state-of-the-art infrastructure, donors can donate towards constructing a new building or name an existing infrastructure.

*All amounts are subject to inflation and may be revised without notice.
